Red Ten-T

TEN-T revision trilogye- cycling and active modes

**Prominent role of active modes.
include multiple references to active modes,
walking and cycling
infrastructure, further improving the
legislative
proposal published by the European
Commission in 2021**

Air Quality Directive

Walking, cycling and public transport make public health

Cycling Europe Strategy

The European Parliament adopted the resolution on developing an EU cycling strategy.

European Year of Cycling 2024

European year of cycling 2024
is within our grasp

European Year
of cycling 2024

Challenges

European Cycling Strategy will be transferred to the political agenda and its momentum during the Spanish presidency.

Challenges

Incorporate new road safety indicators, prioritize the development of cyclo-logistics, promote more investment to active mobility..

Challenges

In conclusion: cycling is a tool to mitigate climate change and incorporate greater climate ambition into European policies

Thank you
